

I. AMENDMENTS TO THE SPECIFICATION

Page 2, paragraph starting on line 12:

As known, fluorinated vinyl ethers are a class of valuable monomers to obtain various polymers, from fluorinated elastomers to thermoprocessable semicrystalline fluorinated polymers. The vinyl ethers having the above mentioned end ~~group~~ group form a particular class of vinyl ethers, since they allow one to obtain fluorinated polymers having improved properties. See EP 1,148,041 and EP 1,148,072.
